TESTING A WATCH.

English Timepleces Tried as to Their

Correctness and Regularity.
There has been watchmaking at Coventry as long as there has been a watch trade in England, which is for the last 200 years or thereabouts, says the Jewelers' Review. There used to be three centeres of the English trade, these being Liverpool, Coventry and London; now there are practically but two, Coventry and Birmingham. The test of a good watch is that it should

not forgotten the way home. It brought At Jacksonville, Fla., at 9 o'clock a note from Nansen stating that all was and turned the bird loose. The frail courier darted out into the blizzardly air. It flew like an arrow over 1,000 miles of frozen waste and then sped forward over another 1,000 miles of ocean and plains and forests, and one morning entered the window of the waiting mistress and delivered the message which she had been awaiting so anxiously. We boast of human pluck, sagacity and endurance, but this loving little carrier pigeon, in its homeward flight, after an absence of 30 months, accomplished a

THE MARIETTA STREET RAILWAY COMPANY,
Defendant.

Notice is hereby given that by virtue of an order of sale issued out of the Clerk's office of the Court of Common Pleas of Washington County, Ohio, to me directed, I will offer for sale, at Public Auction, on the premises, at the car-barn at the Northern terminus of the Marietta Street Railway, in Putnam Place Sub-Division in the City of Marietta, Ohio, on SATURDAY, THE SOTH DAY OF JANUARY A. D.

two, Coventry and Birmingham. The test of a good watch is that it should obtain a Kew certificate, and of the watches that go to Kew 75 per cent. are from Coventry.

At Kew no watch has yet succeeded in getting the hundred marks which signify perfection, but Coventry has come nearest, with 92, and is always well to the front. The Kew test is no light one. The watch is tested in every position, and its rate registered, not only per day, but per hour; it is hung by its pendant, hung upside down, hung on each side, placed dial down and back down and at any number of angles, and to finish up with is baked in an oven and frozen in an ice pail. No wonder that a watch with a Kew certificate is a comfort to its owner.

When it is considered that it makes 12,000 vibrations an hour and must not vary a second a week, while a quarter turn of its two time screws, meaning the millionth of an inch, will make a difference of 20 seconds a day, the delicacy of its adjustment will be appreciated, as will also the risk of intrusting its repair to any but skillful hands.

THE CARRIER PIGEON.

An Explorer's Wife Cheered by the Message That It Brought.

One day a wonderful bird tapped at the window of Mrs. Nansen's house at Christiana. Instantly the window was opened and the wife of the famous arctic explorer in another moment covered the little messenger with kisses and caresses, says the Philadelphin Times. The carrier pigeon had been away from the cottage 30 long months, but it had not forgotten the way home.
